

PAPISHETTY SAI CHAITANYA

Mobile: 6281419074 | Email: saichaitanya553@gmail.com | Github | LinkedIn | Portfolio

Professional Summary

Aspiring Software Engineer with hands-on experience in designing, developing, testing, and maintaining responsive web applications using Java, Python, JavaScript, React.js, Node.js, Flask, SQL, and MongoDB. Strong foundation in software engineering principles, object-oriented programming, data structures, algorithms, RESTful APIs, debugging, and secure coding practices. Familiar with Agile development, Software Development Life Cycle (SDLC), Git-based version control, CI/CD concepts, automation, and modern development tools. Built scalable, reliable software solutions using AI-assisted development tools responsibly while collaborating effectively with cross-functional engineering teams.

Education

B.E Computer Science Engineering

2023 – 2027

Malla Reddy Engineering College

CGPA: 8.53

Technical Skills

Languages: Python, Java, JavaScript, C

Frameworks: Flask, React.js, Node.js

Software Engineering: Object-Oriented Programming (OOP), Data Structures & Algorithms, Software Engineering, RESTful APIs, SDLC, Secure Coding, Debugging, Software Testing Fundamentals, Problem Solving, Operating systems, Distributed systems

Databases: SQL, MySQL, MongoDB

Development Practices: Agile Methodology, CI/CD Concepts, Automation, Version Control

Tools: GitHub, VS Code, Figma, Framer

Soft Skills: Analytical Thinking, Problem Solving, Fast Learner, Self-Driven, Collaboration & Teamwork, Communication, Adaptability, Time Management, Innovation mindset

Projects

Website Blocker Application (Python)

- Developed a Python desktop application to block distracting websites by modifying the system hosts file.
- Implemented URL blocking by modifying system host files to restrict access to selected websites.
- Technologies: Python, File Handling

Resort Booking Platform

- Built a responsive web-based resort booking system for searching and reserving accommodations.
- Improved navigation by simplifying the booking workflow.
- Reduced user interactions required to complete a booking.
- Technologies: HTML, CSS, JavaScript

Age and Gender Detection using Deep Learning

- Developed a CNN-based age and gender prediction web application using Python and Flask.
- Built an end-to-end prediction pipeline including image preprocessing, model training, inference, and web deployment.
- Reviewed, Cleaned, and Preprocessed 20,000+ images, improving training data quality and increasing model accuracy.
- Optimized preprocessing and model performance to improve prediction accuracy and user experience.
- Technologies: Python, Flask, TensorFlow, OpenCV, NumPy

Certifications

- Azure AI Fundamentals – Microsoft
- Python Programming – TechAugusta
- Cloud Computing Foundations – Google
